

TURNAROUND AND MAINTENANCE

Founded in 1984, Matrix Service is a subsidiary of Matrix Service Company (Nasdaq: MTRX), a top-tier engineering, construction and maintenance company that, through our family of brands, designs, builds and maintains infrastructure critical to North America's energy, power and industrial markets. Matrix Service offers engineering, procurement, construction, maintenance, turnaround and industrial cleaning services. The company holds a leadership position in the engineering, fabrication, construction and repair of aboveground storage tanks and specialty vessels.

Safety. Integrity. Positive relationships. Stewardship. Delivering the best. It is these core values that have forged our reputation for excellence.

A HIGHER STANDARD IN CONSTRUCTION.

Reliably providing quality turnaround and maintenance services safely

We have the experience to execute multiple turnaround projects of any degree of complexity, ranging from a single unit to an entire plant. Our deeply experienced team of project managers and field supervisors expect the unexpected and tackle challenges through constructability/design reviews, planning, appropriate staffing, project controls, equipment and material procurement, outsourcing and subcontractor management. We equip our teams with advanced specialty equipment to safely minimize cost and maximize time savings, including truck mounted bundle extractors, tube rolling equipment, torqueing and tensioning equipment, remote operated aerial extractors, automated cleaning/blasting equipment, Carey Lifts, straddle carriers and other specialized equipment and tools.

Our project teams specialize in large scale mechanical repair and maintenance of complex refinery units including HF alkylation units, FCCU and coker revamps, heavy lift top head/cyclone replacements, coke drum repairs and replacements and installation of coke drum bottom unheading devices.

We understand the critical nature of turnarounds and the need to safely and effectively manage these projects, ensuring an on time and leak free startup. Our personnel are committed to providing outstanding service, while continually searching for innovative ways to improve safety, quality, and productivity.

TURNAROUND AND MAINTENANCE SERVICES

- General mechanical turnaround services
- FCC, alky and coker specialty services
- Routine, preventive and supplemental maintenance services
- Turnkey exchanger services and slab management
- Fin fan re-tubes and repairs
- Piping fabrication, installation and modification
