

EAGLE LNG JAX II

CLIENT - Eagle LNG
LOCATION - Jacksonville, FL
COMPLETED - July 2016

DESCRIPTION

Matrix Service was awarded a contract for the engineering, procurement, fabrication, and construction of a 1,000,000 gallon liquefied natural gas (LNG) cryogenic tank for the second Eagle LNG Plant in Jacksonville, FL. Eagle LNG is a wholly owned subsidiary of Ferus Natural Gas Fuels LP. The inshore facility will be used to provide bunkering to two Crowley Marine ships that transport freight and other commodities from Jacksonville to Puerto Rico. The facility will also have the capacity to load ISO containers that will ship LNG to remote locations.

PRINCIPAL FEATURES

- Engineering
- Construction
- Fabrication
- Single containment tanks
- 9% nickel inner and carbon steel external shells
- FERC compliant design
- Construction commenced 1st quarter 2016
